

INTRODUCING PREVAGE™ A STRONGER AGE, FIGHTER

The most potent antioxidant cream available

PREVAGE™ antioxidant cream contains idebenone. Scientific clinical studies recently presented at the Annual Meeting of the American Academy of Dermatology have shown idebenone to be the most effective and powerful antioxidant agent available today in protecting the skin against environmental factors known to cause skin aging (sun, smoking, ozone) when compared to other antioxidants (Vitamin C, Vitamin E, lipoic acid, kinetin, and coenzyme Q10).

PREVAGE™ antioxidant cream corrects much of the skin damage that one already has, and helps to protect the skin from future damage. The antioxidant effects of idebenone were clinically proven after only 6 weeks of use to significantly reduce fine lines and Wrinkles, reduce skin toughness and dryness, increase skin hydration, and reduce skin mottling and irregular pigmentation, resulting in a more even and youthful looking skin tone.

We are proud to make **PREVAGE™** available through our office in our ongoing commitment to provide our community with the most effective and up to date modalities of skin restoration, rejuvenation, and enhancement available. Please call us for more information or to obtain **PREVAGE™**.
